D'Alessio Launches Architectural Building Design Website – Reveals Timeless Craftsmanship

Artisan Crafted Architectural Details Reflect A Modern Retake Of A By-Gone Era In Building Design & Construction

NEW HOPE, PA [date] [**D'Alessio Inspired Architectural Designs**](#) a national Building Design, Architectural, and Construction Company, launches www.builtbydalessio.com. The all-new website emphasizes exquisite architectural details that create elegant residences and how today's building designers and architects can enhance home building artistry. [The company](#), which includes stone experts [**D'Alessio & Sons Masonry**](#), offers an integrated continuum of high quality architectural building design services.

"We created www.builtbydalessio.com as a resource for our clients to see the possibilities of artisan quality craftsmanship employed with today's modern building design and construction techniques. Timeless, enduring structures can be achieved today as with still standing 13th century European castles," states D'Alessio Inspired Architectural Designs President [Andrea D'Alessio, Jr.](#)

Incorporating architectural asymmetries gives [**D'Alessio built structures distinctive sculptural quality**](#) and unique character. Allowing delicate refinements of line, proportion and scale in the form of curves and off-center alignments.

Renowned for blending European 18th & 19th century Gothic and Romanesque handcrafted architectural details with 21st century modern luxuries, [**D'Alessio creates awe-inspiring, one-of-a-kind residences**](#). Rich exterior/interior artisan details of a by-gone era are luxurious and opulent, yet elegant and sophisticated. Whether its hand-chiseled hammered stone facades, [**60' brick stacked chimneys**](#), 'fleur dis lis' adorned rooflines, circular marble staircases, Venetian Groin-Vault ceilings, Corinthian, Roman, Ionic capitals or the subtlety of how moldings turn corners and terminate. It's this design vision that gives more massive D'Alessio structures, charm, refinement and warmth that softens the overall effect, keeping it from being merely a massive structure.

"We embrace complexity and approach each of our projects' unique parameters as an opportunity to explore alternative approaches to design, construction and project delivery, while reducing redundancy," D'Alessio adds.

The all-new www.builtbydalessio.com sparks ideas with the [**'Project Showcase' of luxurious chateaus, country estates and modern townhomes**](#), expounding the D'Alessio Inspired Architectural Designs [**philosophy**](#) of what's possible in today's design, architectural and construction industries.

About [**D'Alessio Inspired Architectural Designs**](#)

Is a unique national Building Design, Architectural, Construction Company, providing an integrated continuum of high quality design/build services. [**Specializes**](#) in luxury estates, chateaus, mansions, restoration and reproduction of historic structures in the private, public, institutional and monumental building sectors. www.builtbydalessio.com
